

ADOLESCENT AND ADULT PSYCHOEDUCATIONAL PROFILE (AAPEP) MATERIALS KIT

The Adolescent and Adult Psychoeducational Profile(AAPEP) extends the assessment of the Psychoeducational Profile Revised(PEP-R) to the autistic and communication-handicapped adolescent and older age group in the moderate to severe range of mental retardation. The AAPEP uses the same scoring system as the PEP-R, focusing on emerging skills to facilitate educational and vocational planning. Emphasis is on evaluating functional skills using three areas of assessment: home and school work, performance on the AAPEP, and observation. The AAPEP provides assessment of appropriate placement decisions in residential, educational, and vocational sites.
