## **BACKGROUND**

Since 1972, Division TEACCH has coordinated the nation's largest statewide public based educational and treatment programs for children with autism and related communication handicaps. With current practices emphasizing least restrictive settings, many more children with autism and other severe behavior, learning and communication problems are being served in public schools, thus creating a need for in-service training activities for teachers. In recent years, TEACCH has made its training activities available to teachers and other professionals from around the world.
